

## Answer on Question #4252, Chemistry, Organic Chemistry

### Question

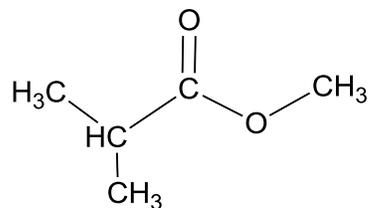

Give the IUPAC name  $\text{CH}_3\text{CH}(\text{C}-\text{OCH}_3)$

I II

$\text{CH}_3$  O  $\text{CH}_3$  attached to CH and  $=\text{O}$  attached to C

### Answer

These do need to be drawn out more precisely but we expect you mean:

which is **methyl 2-methylpropanoate**.
