

Question #51872, Chemistry, Other

For the first case:

$$v = \frac{22.6 + 24.6 + 24.4}{3} = 23.87\text{cm}^3$$

And

$$v = \frac{24.05 + 24.03 + 23.78 + 24.5 + 23.83}{5} = 24.04\text{cm}^3$$
