

Answer on Question#69892 – Chemistry – Organic chemistry

Question:

A collection of coins contains 11 nickels, 5 quarters, and 7 times. What is the percentage of dimes in the collection? Express your answer to the ones place.

Solution:

$$\% = \frac{N(\text{dimes})}{N(\text{coins})} \times 100\% = \frac{7}{11 + 5 + 7} \times 100 = 30.4\%$$

Answer:

30,4%
