## Answer:

b. $4.02 \%$

$$
\begin{gathered}
\text { TIE }=\frac{E B I T}{\text { Interest charges }} \\
\text { TIE }_{1}=\frac{\$ 301,770-\$ 266,545}{0,088 * 0,25 * y} \geq 4 \\
\text { TIE }_{2}=\frac{\$ 301,770-\$ 266,545}{0,088 * x * y} \geq 2,5 \\
y=440312,5
\end{gathered}
$$

$x=0,4-$ is a part of debt equity

$$
\begin{gathered}
R O E=\frac{\text { Net income }}{\text { Shareholders equity }} \\
R O E_{1}=\frac{16599,98}{0,75 * 440312,5}=0,05 \\
R O E_{2}=\frac{13737,75}{0,6 * 440312,5}=0,052 \\
\frac{\boldsymbol{R O E} E_{\mathbf{2}}}{\boldsymbol{R O E}_{\mathbf{1}}}=\frac{\mathbf{0 , 0 5 2}}{\mathbf{0 , 0 5}}=\mathbf{1 , 0 4 0 2}
\end{gathered}
$$
