## Answer on Question \#44460, Engineering, Other

Task: Expand the following Boolean functions into their canonical form $f(X, Y, Z)=X Y+Y Z^{\prime}+X Z^{\prime}+X^{\prime} Y$ ? Answer:

$$
f(X, Y, Z)=X Y+Y Z^{\prime}+X Z^{\prime}+X^{\prime} Y=\left(X+X^{\prime}\right) Y+Y Z^{\prime}+X Z^{\prime}=Y\left(Z^{\prime}+1\right)+X Z^{\prime}=Y+X Z^{\prime} .
$$
