

How to develop a program to Calculate the maturity amount after a period of deposit. The bank pays 4% interest per year for any deposits made. using c#.

Answer

```
using System;

namespace a {
    class Program {

        // Calculate amount from deposit percent 4%
        static double CalculateAmount(double amount) {
            return amount * 1.04;
        }

        static void Main(string[] args) {
            // example of work
            Console.WriteLine(CalculateAmount(12000));
            Console.WriteLine(CalculateAmount(4500));

            Console.ReadKey();
        }
    }
}
```
