

Use a truth table to determine whether the argument given below is valid:

If it is a wild animal, it is dangerous. If it is dangerous, it will hurt you. However, it is not dangerous. Therefore, it is not a wild animal.

Answer:

It is not true. Not all dangerous animals are wild. The same not only wild animals can hurt

	Wild animal	Hurt	
dangerous	Truth	Truth	
Not dangerous	false	truth
