Solve

$$|x^2 - 3x + 3| = 3$$

$$\begin{bmatrix} x^2 - 3x + 3 = 3 \\ x^2 - 3x + 3 = -3 \end{bmatrix} => \begin{bmatrix} x^2 - 3x = 0 \\ x^2 - 3x + 6 = 0 \end{bmatrix} => \begin{bmatrix} x_1 = 0, & x_2 = 3 \\ D < 0 => no \ solution \end{bmatrix}$$

Answer: 0; **3**
