

Answer on Question #42084, Math, Trigonometry

Find the angel of least positive measure that is co-terminal with negative 223 degrees.

Solution.

If the angle is negative, we keep adding 360° until the result is between 0° and 360° .

$$-223^\circ + 360^\circ = 137^\circ.$$

Answer: 137° .
