

Answer on Question #44042 – Math – Geometry

ABC is a triangle in which $AB=AC=4$ cm and angle $A=90$ degrees. Calculate the area of triangle ABC.

Solution

The Area of triangle ABC is calculated by the following formula:

$$S_{\Delta ABC} = \frac{1}{2} |AC| \cdot |AB| = \frac{1}{2} \times 4 \text{ cm} \times 4 \text{ cm} = \frac{16}{2} \text{ cm}^2 = 8 \text{ (cm}^2\text{)}$$

Answer: 8 cm^2 .
