Answer on Question 45782, Math, Calculus Confirm that $f$ and $g$ are inverses by showing that $\mathrm{f}(\mathrm{g}(\mathrm{x}))=\mathrm{x}$ and $\mathrm{g}(\mathrm{f}(\mathrm{x}))=\mathrm{x}$. $f(x)=x^{2}-3$ and $g(x)=$ square root of quantity three plus $x$ Solution

$$
\begin{gathered}
f(g(x))=g(x)^{2}-3=(\sqrt{3+x})^{2}-3=3+x-3=x \\
g(f(x))=\sqrt{f(x)+3}=\sqrt{x^{2}-3+3}=\sqrt{x^{2}}=x
\end{gathered}
$$
