

Answer on Question #46168 – Math - Analytic Geometry

Problem.

Find the equation of the line which passes through $(1, \sqrt{3})$ and makes an angle 30° with the line $x - \sqrt{3}y + \sqrt{3} = 0$.

Solution.

The slope of line $x - \sqrt{3}y + \sqrt{3} = 0$ is $y = \frac{1}{\sqrt{3}}x + 1$ (red line). $\frac{1}{\sqrt{3}} = \tan 30^\circ$, so the slope of the line which makes an angle 30° with the line $\tan 0^\circ = 0$ or $\tan 30^\circ = 0$. Then the new line has equation $y = \sqrt{3}$ (green line) or $y = \sqrt{3}(x - 1) + \sqrt{3} = \sqrt{3}x$ (blue line) (as the both pass through point $A(1, \sqrt{3})$).

Answer: $x = \sqrt{3}$ or $y = \sqrt{3}x$.
