

## Answer on Question #46173 - Math - Analytic Geometry

### Problem.

Trace the conicoid given by  $x^2 + 2z^2 = 4y$ . What are the sections of this conicoid by the planes  $x+2=0$  and  $y=1$ ? Describe geometrically.

### Solution.

The intersection of conicoid  $x^2 + 2z^2 = 4y$  with plane  $x + 2 = 0$  is parabola  $4 + 2z^2 = 4y$  (red line) in the plane  $x + 2 = 0$ .

The intersection of conicoid  $x^2 + 2z^2 = 4y$  with plane  $y = 1$  is parabola  $x^2 + 2z^2 = 4$  (blue line) in the plane  $y = 1$ .
