

Answer on Question #81060 - Math - Algebra

Question

What year is it now if century plus a score plus a decade plus a year ago was 1856?

Solution

If we want to understand what year it is now, we should add to the year that we know, 100 years, 20 years, 10 years and 1 year.

$$1856 + 100 + 20 + 10 + 1 = 1987$$

Answer: 1987.
