## Question \#14313

Given that the puck covered 30 meters in 0.38 seconds, find the velocity $v=\frac{30 \mathrm{~m}}{0.38 \mathrm{~s}} \approx 75.95 \mathrm{~m} / \mathrm{s}$. The momentum (linear momentum) is given by $p=m v$, hence $p=75.95 \mathrm{~m} / \mathrm{s} \cdot 0.25 \mathrm{~kg} \approx 19.74 \mathrm{~kg} \cdot \mathrm{~m} / \mathrm{s}$.
