Question \#23269
a truck travelled at 25 meters per second puts its break on for 4 seconds. this produces acceleration of 2 meters per second square.what does the truck's velocity drop to?

## Solution:

The equation of velocity on equally accelerated motion is:

$$
\begin{aligned}
& v=v_{0}+a t \\
& v_{0}=25 \mathrm{~m} / \mathrm{s} \\
& a=-2 \mathrm{~m} / \mathrm{s}^{2} \\
& t=4 \mathrm{~s} \\
& v=25-2 * 4=17 \mathrm{~m} / \mathrm{s}
\end{aligned}
$$

Answer: $\mathbf{1 7}$ m/s.
