## Answer on Question \#51013-Physics-Other

Which of the following is the correct unit of k in the equation of a damped harmonic oscillator given as

$$
-b v-k x=m a
$$

where $b$ is the damping factor and all the symbols have their usual meaning?

## Answer

The unit of $k x$ is the same as unit of $m a$

$$
[k x]=[m a] .
$$

The unit of $k$ is

$$
[k]=\left[\frac{\mathrm{ma}}{x}\right]=\frac{\mathrm{kg} \cdot \frac{\mathrm{~m}}{\mathrm{~s}^{2}}}{\mathrm{~m}}=\frac{\mathrm{kg}}{\mathrm{~s}^{2}}
$$

Answer: $\boldsymbol{k g} \cdot \boldsymbol{s}^{\mathbf{- 2}}$.
