

Answer to Question#51682 - Physics - Optics

Question

20 Which of the following is NOT correct?

- a. light is a longitudinal wave
- b. light is a transverse wave
- c. light is an electromagnetic wave
- d. light can exhibit the phenomenon of polarisation

21 Light is a form of energy that -----

- a. is transported from place to place due to the temperature gradient
- b. requires material media for its propagation
- c. stimulates the sensation of sight
- d. cannot be diffracted

Answer

20. a)

21. c)
