

Answer on Question #51978, Physics, Mechanics | Kinematics | Dynamics

Question:

Which of the following is the correct unit of k in the equation of a damped harmonic oscillator given as $-bv - kx = ma$, where b is the damping factor and all the symbols have their usual meaning

Answer:

Equation of a damped harmonic oscillator:

$$-bv - kx = ma$$

unit of ma is:

$$[ma] = \left[kg \frac{m}{s^2} \right]$$

therefore unit of kx :

$$[kx] = [ma] = [k][x] = \left[kg \frac{m}{s^2} \right] = \left[\frac{kg}{s^2} \right] [m]$$

unit of k is:

$$[k] = \left[\frac{kg}{s^2} \right]$$

Answer: $\frac{kg}{s^2}$
