

Answer on Question #56548-Physics-Mechanics-Relativity

22.

Solution

The ratio of moments of inertia about diameter is

$$\frac{I_{ssph}}{I_{hsph}} = \frac{\frac{2}{5}mr^2}{\frac{2}{3}mr^2} = \frac{3}{5}.$$

Answer: (D) 3:5.

23.

Solution

For cube:

$$I = \frac{1}{6}ma^2$$

For ring:

$$I = mr^2 = m\left(\frac{d}{2}\right)^2 = m\left(\frac{a}{2}\right)^2 = \frac{1}{4}ma^2$$

For disc:

$$I = \frac{1}{2}mr^2 = \frac{1}{2}m\left(\frac{d}{2}\right)^2 = \frac{1}{2}m\left(\frac{a}{2}\right)^2 = \frac{1}{8}ma^2$$

For sphere (hollow):

$$I = \frac{2}{3}mr^2 = \frac{2}{3}m\left(\frac{d}{2}\right)^2 = \frac{2}{3}m\left(\frac{a}{2}\right)^2 = \frac{1}{6}ma^2$$

The largest is $\frac{1}{4}ma^2$.

Answer: (A) Ring.
