## Answer on Question \#66459-Physics-Other

A simple harmonic motion is represented by

$$
x(t)=\cos \omega t
$$

Obtain expressions for velocity and acceleration of the oscillator. Also, plot the time variation of displacement, velocity and acceleration of the oscillator.

## Solution

The velocity is

$$
v(t)=\frac{d x}{d t}=-\omega \sin \omega t
$$

The acceleration of the oscillator is

$$
a(t)=\frac{d v}{d t}=-\omega^{2} \cos \omega t
$$

The plot of the time variation of displacement, velocity and acceleration of the oscillator for $\omega=1$ :
