

```
#include <iostream>
#include <string>

using namespace std;

int main()
{
    string name[3];

    cout << "Enter three names: \n";
    cin >> name[0] >> name[1] >> name[2];

    for (int i = 0; i < 3; i++)
        for (int j = 0; j + i + 1 < 3; j++)
            {
                if (name[j] > name[j + 1])
                {
                    string temp;
                    temp = name[j];
                    name[j] = name[j + 1];
                    name[j + 1] = temp;
                }
            }

    cout << "\nThree names in ascending order:\n";
    cout << name[0] << ' ' << name[1] << ' ' << name[2] << '\n';

    system("pause");
    return 0;
}
```
