

## Answer on Question#38167, Programming, C++

```
#include <iostream>
using namespace std;

int main()
{
    int n;
    int counter = 0;
    for(int i = 0 ; i < 10; ++i)
    {
        cin >> n;
        if(n > 50)
            ++counter;
    }
    cout << counter << endl;
    return 0;
}
```
