

Answer on question #38981, Programming, C++

```
#include <cstdlib>
#include <iostream>
using namespace std;

int main() {
    int b = 10;
    int** ptrptr;
    ptrptr = new int*;
    *ptrptr = &b;
    cout << (*(*ptrptr)) << endl;

    return 0;
}
```
