

// "Answer on Question #37520, Programming, C++

```
#include<string.h>

#include<iostream>

using namespace std;

int main() {

    int a,s,d,z;

    cout <<"Enter the number of units consumed by a customer : ";

    cin>>a;

    if (a<200 )

        z=1.9*200;

    if (a>200 && a<300 )

        z=1.9*200+(a-200)*3;

    if (a>300 && a<500 )

        z=1.9*200+100*3+(a-300)*5;

    if (a>500 )

        z=(1.9*200+100*3+(a-300)*5)*1.15;

    cout<<"Charges "<<z<<endl;

    system ("Pause");

}
```
