

```
/* Answer on Question#39108 - Subject - Programming, C++ */
```

```
#include <stdio.h>
#include <stdlib.h>

int main() /* main function*/
{
    double sales[6] = {0}; /*set array to zero
    char s[6];

    //read sales from user into array of double
    printf("Enter sale for Mon: ");
    scanf("%s",s);
    sales[0] = atof(s);

    printf("Enter sale for Tu: ");
    scanf("%s",s);
    sales[1] = atof(s); //conv from char to double

    printf("Enter sale for Wed: ");
    scanf("%s",s);
    sales[2] = atof(s);

    printf("Enter sale for Thu: ");
    scanf("%s",s);
    sales[3] = atof(s);

    printf("Enter sale for Fri: ");
    scanf("%s",s);
    sales[4] = atof(s);

    printf("Enter sale for Sat: ");
    scanf("%s",s);
    sales[5] = atof(s);

    printf("Enter sale for Sun: ");
    scanf("%s",s);
    sales[6] = atof(s);

    printf("\n");
    printf("Echo sales:\n");

    for(int i=0; i<=6; i++)
    {
        printf("%5.3f ",sales[i]); /*output sales*/
    }
    printf("\n");

    // search for max and min number in array
    double min = sales[0],max = sales[0];
    for (int j=0; j<=6; j++)
