

Answer to the Question #39944, Programming, C++

```
#include <stdio.h>

int difference(int one, int two);

int main() {
    int a, b;
    scanf("%d %d", &a, &b);
    printf("%d\n", difference(a, b));

    return 0;
}

int difference(int one, int two){
    return one - two;
}
```
