

Answer on Question #44265- Programming, Java | JSP | JSF

1. Have you any idea how to get information from a class to appear in a text area on a GUI when you click a word in a list box on the GUI?

Solution.

```
private void jList1MouseClicked(java.awt.event.MouseEvent evt) {  
    jTextField1.setText(jList1.getSelectedValue().toString());  
}
```
