

Answer on Question #48751 – Programming – C

```
#include <stdio.h>
#include <math.h>

double GetArea(double, double, double);

int main(){
    double a, b, c, area;

    scanf("%lf", &a);
    scanf("%lf", &b);
    scanf("%lf", &c);

    area = GetArea(a, b, c);
    printf("Area: %lf\n", area);

    getchar(); getchar();
}

double GetArea(double a, double b, double c){
    double s = (a + b + c) / 2;
    return sqrt(s*(s - a)*(s - b)*(s - c));
}
```
