

Answer on Question #49786, Programming, C++

Problem.

Draw a flowchart to Output all the even numbers from x to y, where x and y are variables

Solution.

FlowChart (<http://code2flow.com/Ofe2cW>)

Code

```
#include <iostream>

using namespace std;

int main()
{
    // Input
    int x, y;
    cin >> x >> y;

    // Output
    for (int i = x; i < y; i++)
    {
        if (i % 2 == 0) {
            cout << i << " ";
        }
    }

    return 0;
```

}
