

Question #59371, Programming & Computer Science / C# | completed

Program.cs

```
static void Main(string[] args)
{
    Console.Write("Enter your e-mail IDs at Pace University: ");
    string id = "";
    try
    {
        id = Console.ReadLine();
        char s = id[0];
        if (!Char.IsLetter(id[0]) || !Char.IsLetter(id[1]))
            throw new Exception("in the first and last initials");
        for (int i = 2; i < 7; i++)
        {
            if (!char.IsDigit(id[i]))
            {
                throw new Exception("in digits");
            }
        }
        if (Char.ToLower(id[7]) != 'p' && Char.ToLower(id[7]) != 'n')
            throw new Exception("in the last letter");

        Console.Write("SUCCESS!");
    }
    catch (Exception e)
    {
        Console.WriteLine("Error " + e.Message + "!");
    }
    Console.ReadKey();
}
```
