

Answer on Question #63584 – Programming & Computer Science | Visual Basic

```
Public Class frmShopPrices
    Dim I As Double

    Private Sub btnCulc_Click(sender As Object, e As EventArgs) Handles btnCulc.Click
        I = 0.25
        txtPrice.Text = FormatCurrency(txtPrice.Text, 2)
        For Each c As TextBox In discPrices.Controls.OfType(Of TextBox)()
            c.Text = FormatCurrency(((txtPrice.Text) - Cdbl(txtPrice.Text) * I), 2)
            I = I - 0.05
        Next
    End Sub

    Private Sub btnClr_Click(sender As Object, e As EventArgs) Handles btnClr.Click
        txtPrice.Text = ""
        For Each c As TextBox In discPrices.Controls.OfType(Of TextBox)()
            c.Text = ""
        Next
        txtPrice.Focus()
    End Sub
End Class
```
