

Question #79876

What does `g(31415927)` return, for the following function definition?

```
def g(x):  
    (q,d) = (1,0)  
    while q <= x:  
        (q,d) = (q*10,d+1)  
    return(d)
```

Solution:

```
def g(x):  
    (q,d) = (1,0)  
    while q <= x:  
        (q,d) = (q*10,d+1)  
    return(d)
```

```
print(g(31415927))
```

Test1:
