

### Question #81123

Write a Python statement that creates a list named `dog_breeds` that contains the elements 'collie', 'sheepdog', 'Chow', and 'Chihuahua'.

#### Answer:

The statement is as follows:

```
dog_breeds = ['collie', 'sheepdog', 'Chow', 'Chihuahua']
```

The screenshot below shows how the statement work.

```
>>> dog_breeds = ['collie', 'sheepdog', 'Chow', 'Chihuahua']
>>> dog_breeds
['collie', 'sheepdog', 'Chow', 'Chihuahua']
```
