

Answer:

```
#include <stdio.h>
```

```
int main(void) {  
    // Defining variables for day, month and year  
    unsigned int day, month, year;  
  
    // Reading day  
    do {  
        printf("Input day of birth:");  
        scanf("%u", &day);  
    } while (day < 1 || day > 31);  
    // Reading month  
    do {  
        printf("Input month of birth:");  
        scanf("%u", &month);  
    } while (month < 1 || month > 12);  
    // Reading year  
    printf("Input year of birth:");  
    scanf("%u", &year);  
  
    printf("Date of birth in dd/mm/yy format is : %02u/%02u/%02u\n", day, month, (year %  
100));  
  
    return 0;  
}
```
